

Option 1.

First scene. a panda sitting with only one bamboo shoot beside it. far away there is a bamboo forest.

Zoom in to the bamboo forest. there are all kinds of resources and knowledge in the trees

Slowly blank out and show symbols of applications and websites that chinese government blocks

Zoom out to the panda. he is sad because only one bamboo shoot is left for him.

Turn to the fire blocks the bamboo forest

Show stats and data about the Great Firewall project

pick up the hammer and knock down the wall

after knocking down the wall the panda is happy again!!

Idea 1:

Title: No Bamboos

Option 2.

The first interface is the beginning of the game, click play to play, or option for customized items.

The second interface is the scene in the kitchen. There is spoon, chopsticks, pot, salt, and pepper.

The third scene is a overhead shot of the pot. You can click onion and egg to put in the pot.

when you put in noodles.

when you put in egg and scallion

after you put in everything the game will time 10 seconds until the ramen is ready and show "Yeah"

Idea 2:

Title: Cooking Ramen

Topic: A cooking game that cooks your customized ramen.

Option 3

This project is about time management. We start at 7:00 am, you can choose what you actually do, at the end you will know how long you do everything.

What you choose will affect what options later on appears on your screen.

Sometimes there will be interaction or crossovers, every step will count as different time categories.

If you choose to choose certain options, there will be visuals that appear and lead you to the next step.

Similar to recent interfaces your choice affect the final results.

You can choose to jump to certain hour later if you are doing a long task.

At the end, you will receive a calculated score and how lazy and efficient you are.

Idea 3:

Title: Time Management self survey

Topic: A program that examines your time management skills.

Option 4

This is a typing game
that can help people
who need to practice
typing skills and also
have fun.

Press enter to start
and follow the sentence
to type

After you type the
right word or letter
the letters you typed
will become green

On the other hand, if
you typed something
wrong, the color of the
letter will become red

When you type, you
can also see on the
screen which letter you
typed

This way, you can
try to blind type
you can turn off the
type based on the screen
as well

You can use the timer
to time how long your
record is

Idea 4:

Title: Typing Game

Topic: A useful game to make typing fun and easy to learn.
